SPECULATION IN STOCKS CONFINED (The quotations given below are the selling prices of wholesale dealers.) TO A FEW ROOM TRADERS.

Sales of Shares Barely Over the 100,-000 Mark-Indianapolis Grain Has Little Attraction.

At New York, yesterday, money on call was easy at 1 per cent.

Prime mercantile paper, 24@41/2 per cent. Sterling exchange was steady with actual business in bankers' bills at \$4.88% for demand and at \$4.87 % for sixty days; posted rates, \$4.88\\04.90; commercial bills, \$4.86\%. Silver certificates, 64@65c. Bar silver closed

at 61%c per ounce; at London, 28 5-16d. Total sales of stock were 100,114 shares. The speculation on the Stock Exchange Thursday was dull and uninteresting, the trading in Sugar and Chicago Gas alone relieving the market from utter stagnation. What trading was done was mostly on the short side of the market, the influences affecting the speculation being mainly of an unfavorable character. Although the sterling exchange market was a shade easier in tone, shipments of gold were increased unexpectedly, bringing the total exports so far this week up to \$3,000,000, and a similar amount will go forward, it is thought, on Saturday. This had a depressing effect on the market and the receipt of reports of several railroads, which showed decreased earnings for April heavier than were anticipated, added to the general weakness. The London houses were not in the market to any appreciable extent, the extent of the foreign trading being the buying of some small lots of St. Paul and Louisville & Nashville. Sugar, while most active of the list, was not very extensively active of the list, was not very extensively dealt in. After an early break of 1 per cent. a covering movement was begun, which resulted in an advance of 1%. Renewed selling checked the improvement and a gradual decline set in, resulting in the loss of the entire gain. In the final dealings there was a rally of %, with a reaction of % at the close, making a decline of ½ per cent. on the day. The preferred shares lost a similar fraction. Chicago Gas was in brisk demand during the morning hours, the buying being almost entirely for the account of the bull pool, recently formed in that stock. These purchases caused an advance of 14, of which I per cent, was lost in the afternoon, leaving only a gain of ¼ on the last sale of Tuesday. Fluctuations in the granger shares were within fractional limits, St. Paul and Rock Island losing 1% and ¼, respectively, and Burlington & Quincy gaining ¼ on the day. The market at the close was steady to

bond market was firm during the morning, but became easier during the afternoon and closed weak. The principal Declines-Lake Erie & Western seconds, and Northern Pacific seconds, 1 per

Government bonds were strong and State bonds were dull. The following table, prepared by James E. Berry, Room 16, Board of Trade, shows the

Trade Quiet, Merchants Blue and Prices Generally Steady.

The continued unseasonable weather is cutting down trade in all departments. On Commission row the conditions are hardly as discouraging. Wholesale grocers are doing better than the merchants in other lines. In staple groceries, dry goods, hardware, leather and like lines prices carry an unusually steady tone. Commission men are disposed to push up prices. The cold weather is holding back articles of home growth, which should now be on the marhet. Potatoes, both old and new, are firm and advancing. Cabbage has passed into the luxury list. But little is on the market, and the heads are small and too expensive for persons of moderate means. Choice strawberries are scarce and bring good prices. There is considerable inferior stock offered, which sells low. Poultry and eggs are firm. Chickens are in active request. The local grain market, yesterday, was rather tame. Dealers and shippers hold off as if they did not care to have much to

ENEMY OF MANKIND. Prof. Jordan Sums Up the Evils of

Spirits on the Nerve Centers. San Francisco Chronicle. Prof. David Starr Jordan, of Stanford University, has been talking to the temperance congress at the Midwinter fair. President Jordan had for his subject, "The Relation of Artificial Stimulants to Human Evolution." The Professor said that the

human race was always changing-slowly, but always changing. Sometimes it was advancing and sometimes retrograding. great field for study was what is injurious to a race. If the American people are leading a life below a reasonable ideal, then they will eventually perish. But if a portion are living up to this ideal and others are not, then one portion will progress and the other will be eventually eliminated. Professor Jordan spoke of ideness as a cause of deterioration. Everything in the direction of happiness must come in the line of action. Happiness is always the ac-companiment of doing something. The highest form of happiness comes from the sintimental, the spiritual. Love is one of the highest forms. Every grade of happiness comes from doing something, from the exercise of some function. The terrible disease of idleness is sometimes called the grand ennul. The poor who work slavishly without putting their souls into their labor are just as much the subjects of this ennui as the rich on their velvet cushions. This is because they work slavishly. Existence without some form of activity cannot be Civilized man has found certain drugs

a means of obtaining what he imagines is but which is not. Happiness is a lasting normal condition, while pleasure is false and quickly burned out. The rich will take these artificial stimulants to overcome their grand ennui, while the laboring poor without soul in their work take them to dull their slavish misery. Professor Jordan deprecated these tricks upon the nervous system. They make the functions carry messages which are not true. This continual deception of the nervous system will cause the time to come when all the nervous forces will cease to bear correct messages and deterioration and degradation will follow. All forms of stimulation which deceive the nervous system are simply examples of the work of the

The lecturer then dwelt upon the care which should be taken with the rearing of children. A very little interference with the nervous system of a child is frequently of more damage than a very large disturbance to the nerves of a grown system. Professor Jordan told of having in a railway train seen a mother give her baby a cup of coffee. The cup of coffee did far more to disarrange that child's nervous, system and to prevent it from seeing rightly than one hundred bottles of champagne would to a mature man.

The effect of all stimulation on the human system is bad. Everything that makes a man feel better than he really is is bad, If this cause of stimulation is continued then the descendants will deteriorate. Just as stimulants falsely exhilarate, so are they followed by a corresponding degree

The best literary works have been the result of clear and steady effort and have not been produced under the influence of absinthe, rum, tea, coffee or arsenical nerve tonics. It will come in the development of time that he who chooses the right, who chooses clear-headedness; his descendants will choose the right and be clear-headed.

"Flamboyant Jane."

Musical Corner. Calve has been called Flamboyant Jane in the company on account of her reckless and ridiculous behavior. The reason Jean de Reszke will not sing with Calve is because of the incident which occurred during the Chicago engagement. It was at a "Carmen" performance, and Calve was acting in a more than erratic manner She flew all over the stage and Jean could never get near her. His Slavonic mad kept growing larger and larger and it finally bubbled over in the last act. When the death scene came Calve began sprinting for dear life, letting go that Trasteverine yell of bers. De Reszke, who is ponderous in girth, chased her with a big knife, but finally got winded, and just at that moment, when the orchestra crashed out the "fate motive," Calve disappeared in the

wings and Jean stabbed the air very vin-Now, the Polish tenor is a very conscientious man. It grieved him that an artist could so glaringly disrespect the conve-nances of the situation. With fire in his eye he ran off the stage, straightway to Calve's dressing room, and there found the lady fanning herself. He uidn't waste any time on explanations, but grabbed her by the wrists, and in a moment had her on the stage, where she died most beautifully, and only thirty-two bars behind the score. When Mr. Jean de Reszke makes up his mind the fur usually files. In this case he was perfectly justified in being both urgent and muscular.

FIRM GRAIN MARKET

BAD CROP NEWS AND GENEROUS BUYING ORDERS SENT WHEAT UP.

Several Attempts to Beat Down Prices Were Only Partially Successful and All Articles Closed Higher.

CHICAGO, May 31.-Southwestern crop report damage, accompanied by buying orders from the same locality, sent wheat up in long jumps after a weak opening to-day. Realizing shoved the price down again later, but July closed 1/2c higher. Corn finished 1/3c higher, oats 1/4c higher and provisions at a slight advance. Wheat hopped up and down briskly with-

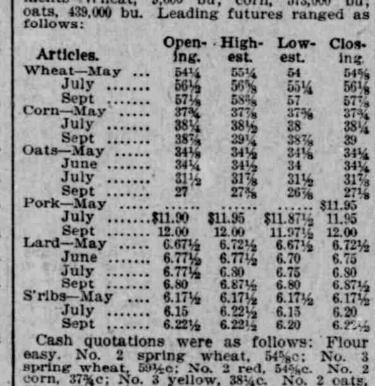

in 1%c range. Opening trades showed a trifle loss and soon sold down 4c lower, when a 1%c rally took place, but did not hold. A %@%c decline set in, after which the price changed but little. The failure of the predicted frost to show on the weather map, the lack of any strength to cables, the prospect of warmer weather and the Price Current's summary all tended to develop bearish features. The situation changed later and the rally which followed was due to the bad crop news which continued to pour in via the Southwest, with liberal buying orders from that section-St. Louis mainly. The impression also prevailed that a prominent local concern, with elevator interests, was buying freely through a half dozen brokers, which had a strengthening tendency. The late continental markets were weak and lower, however, and took the edge off the mar-ket, prices declining sharply when the quo-tations were posted, but the market closed

Corn was nearly firm all day within 40 % range; good demand, and the advance in wheat helped the price. Oats were firmer on good buying, mainly by shorts. After a %c range the market closed near the top. Buying by packers and the action of the wheat caused a firm market in provisions, but trade was small and the range nar-

row. Compared with last night, July pork is 7½c higher. July lard .05c higher and July ribs .02½c higher.

Vessel rates to Buffalo were firmer, with a fair demand at 1%c for corn.

Receipts of yesterday were—Wheat, 21,000 bu; corn, 350,000 bu; oats, 349,000 bu. Shipments—Wheat, 9,000 bu; corn, 573,000 bu; oats, 439,000 bu. Leading futures ranged as follows:

easy. No. 2 spring wheat, 54%c; No. 3 spring wheat, 59%c; No. 2 red, 54%c. No. 2 corn, 37%c; No. 3 yellow, 38%c. No. 2 cars, 34%c; No. 2 white, 37%@37%c; No. 3 white, 37%@37%c; No. 3 white, 37%@37%c; No. 3 white, 38%c. No. 2 barley 364@37c. No. 2 rye, 48@484c. easy at \$2.75@5.25. Indianapolis Horse and Mule Market. Heavy draft. good to extra\$65@100 Extra style and action bring better prices.

Table Manners of Children.

Christine Terhune Herrick. The table manners of children cannot receive too close attention, and yet they sel dom have adequate care bestowed upon them. The constant reproof and admonition required seem but a thankless task for many years. Boys and girls manifest a ter-rible ingenuity in acquiring awkward habits and unpleasant tricks, and an equal slowness in overcoming them. Perpetual "nagging" is always painful, both to the giver and the object, but the recompense of grateful appreciation comes surely, though slowly. Some parents weary of waiting for it and abandon their efforts at

To men nothing can make up for the lack of this early discipline. Women, more im-itative and less transparent in imitation. may tutor themselves into a fair pretense of ease, but a man rarely sufficiently overcomes his self-consciousness to feel other-wise than miserable in a circle where he knows that his habits and manner mark him as of less outward refinement than his associates. Once in a great while the wife of a man may succeed in imparting a pol-ish that transforms the rough article into a tolerable counterfeit of the fine one, but it is at the price of long struggles and bitter mortification alike to husband and wife. It is in the mother's hand that the power is laid, and with her rests the respon if she fails to exercise it aright.

Poor Fruit Unprofitable.

Field and Farm. The outlook for the fruit industry is discouraging only to the producer of poor fruits. Careless and slovenly growers are being fast weeded out of the business. As an authority puts it, there is no money in trying to grow poor fruit cheap, allowing nature to do all and man nothing. What nature does in such cases is to multiply insect enemies and fungus diseases, nature is to do all then nature will take all and leave the lazy member of the firm nothing. On the contrary, if man will work with nature, combating insects and liseases, the fruit will be so much finer that it sells itself at good prices, while the poor fruit can hardly be given away. The best fruit can now, under careful treatment, be produced more cheaply than it was in a state of nature. Now it can be guarded so as to be pretty sure of a crop every year. All prominent fruit growers are agreed on taking this view of the

Don't Trim Your Mustache.

Philadelphia Record. "A fact that involves the possible good looks of the whole male creation is not a trifling one," began a veteran artist on Chestnut street, who claims to have shaved some of the highest dignitaries of the Nation, from President Millard Fillmore down. "When I tell my young customers that the reason why the old cavaliers had such handsome beards was because they never shaved, and that a silky mustache is produced by never shaving it off but once, and then it will retain its natural color long after the hair has turned gray-I know what I am talking about, for I have been asking questions for more than forty years."

It is by many good authorities claimed that no two persons should use the same basin and towel. There is a good deal of good sense in this, and as the world grows wiser we will learn that individuality in all things has its advantage, not only in coavenience but in health. Many of the minor ills of life are now known to be caused by germs that are readily transmitted from one person to another. Almost all eruptions, especially those upon the face, are of this class, and many an exquisite complex-ion has been spoiled by using some to let article belonging to those who are afflicted with these disfiguring blemishes.

To make a very pretty afghan, knit closely on large needles two stripes each of pale rose, blue, white and gold. Run the nar-rowest of ribbon in colors to match the worsted through the meshes. Join the stripes and crochet a shell border of white. edging the shells with white filling silk, Make a large rosette of all the colors used in ribbon and fasten it to the upper lefthand corner.
